

Automated Loan Processing

Follow the below step to import the project into your system:

1. Import the process skill zip file into ABBYY Vantage and create a public API Client connection by navigation to ABBYY Vantage > Configuration > Public API Client > Add New Client. Save the Client ID and Client Secret.
2. Import the web Java project into eclipse and go to GetYoken.java file and replace the Client ID and Client Secret with the copied value.

```
30 import java.io.File;
12
13 public class GetToken
14 {
15     public static String getBearerToken(File uploadedDocument) throws Exception
16     {
17         String clientId = "XXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXX";
18         String clientSecret = "XXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXXX";
19         String tokenEndpoint = "https://vantage-us.abbyy.com/auth2/8b71b94c-4e08-414c-88f4-b319b64a";
20         String validationStatus = "Valid";
21
22         //Obtain Bearer Token
23         String token = getBearerToken(clientId, clientSecret, tokenEndpoint);
24         //System.out.println(token);
25
26         //Get Available Skills
27         //GetSkills.getAvailableSkill(token);
28
29         //Upload Files And Initiate Transaction
30         validationStatus = UploadDocumentsAndLaunch.uploadFilesAndInitiateTransaction(token, upload
```

3. For the tokenEndPoint value give the url as “https://vantage-us.abbyy.com/auth2/” + tenant ID+”/connect/token”. You can get the tenant Id by navigating to vantage > Configuration > General tab.
4. Then open uploadDocumentAndLaunch.java file and replace the existing skill ID with your skill id.

```
try
{
    // Specify the API URL for file upload
    URL url = new URL("https://vantage-us.abbyy.com/api/publicapi/v1/transactions/"
        + "launch?skillId=eeffdc5e-56b7-404a-b8dd-c6ad89fbb8e6");
```

5. Run “Login.html” file and follow the steps followed in the demo video.
