Introduction

About This Document

This document describes the changes made in ABBYY FlexiCapture 12 Release 1 Update 5.

About the Product

ABBYY FlexiCapture 12 is a new version of the FlexiCapture product whose main goal is to provide a stable and scalable Data Capture platform that can serve as a basis for creating regional and vertical solutions.

About the Update

The update is released to add new functionality to the Web Verification Station and to the Login and Reports pages in the Administration and Monitoring console and to support French and Spanish UI languages. It can be installed as a separate distribution kit or on top of FlexiCapture 12 Release 1 and any previous updates (patches or service packs).

Release	Part #	Build #	OCRT build #	Release date
Release 1 Update 5	1299/17	12.0.1.428	15.0.1.243	2017.12.21
Release 1 Service Pack 1 (Update 4)	1299/16	12.0.1.367	15.0.1.243	2017.10.23
Release 1 Patch 3 (Update 3)	1299/15	12.0.1.292	15.0.1.230	2017.08.18
Release 1 Patch 2 (Update 2)	1299/14	12.0.1.282	15.0.1.230	2017.07.19
Release 1 Patch 1 (Update 1)	1299/13	12.0.1.267	15.0.1.224	2017.05.23
Release 1	1299/12	12.0.1.263	15.0.1.223	2017.05.19

Technical Information

New Functionality

1. Optimized Performance for Documents with a Large Number of Line Items

Now the Web Verification Station works faster with documents containing a large number of line items.

For example, the average time to load the data form is 6 seconds for an invoice document that contains 1 page and 4 line items, 9 seconds for an invoice document that contains 8 pages and 200 line items, and 20 seconds for 40 invoice documents that contain 320 line items.

2. Keyboard Shortcuts on the Web Verification Station

Keyboard shortcuts are now available on the Web Verification Station. The list of keyboard shortcuts is currently hardcoded and non-editable. In the next release, this list will be customizable.

Queues View	
Get Task	Ctrl + G
Batch Editor	
Apply Changes	Ctrl + Q
Expand All/Collapse All	Ctrl + M + O/Ctrl + M + P
Create Document	Ctrl + Alt + N
Merge Documents	Ctrl + Alt + M
Clear Analyzing Results	Alt + Del
Rotate 90 Clockwise	Ctrl + >
Rotate 90 Counterclockwise	Ctrl + <
Image Editor	
Fit to Width	Ctrl + 2

Fit to Height	Ctrl + 3
Actual Size	Ctrl + 1
Zoom In	Ctrl + mouse / Ctrl + Num+
Zoom Out	Ctrl + mouse / Ctrl + Num-
Working with Tables	
Draw Vertical Separator	Ctrl + \
Draw Horizontal Separator	Shift + \
Delete Separator	Alt + \
Move Active Region	F2 + up/down/right/left arrow
Delete Active Region	F2 + Del
Data Form	·
Check Rules	Ctrl + Shift + S
Open Drop-Down List	Down arrow
Open Suggestions	Ctrl + down arrow
Go to Beginning/End of Document	Home / End
Next Item to Verify	F4
Previous Item to Verify	Shift + F4
Next Uncertain Symbol	F8
Previous Uncertain Symbol	Shift + F8
Next Error	F6
Previous Error	Shift + F6
Errors Filter Switching	Alt + 1,2
Сору	Ctrl + C
Paste	Ctrl + V
Delete	Del
Next Document with Errors	F9
Previous Document with Errors	Shift + F9
Next Document	Ctrl + D
Previous Document	Ctrl + Shift + D
Go to Beginning/End of Page	Page Up/Down
Go to Beginning of Document	Home
Go to End of Document	End
Confirm Field	Enter
Operations on Task	
Complete Task	Ctrl + L
Reject Task	Ctrl + J
Postpone Task	Ctrl + Alt + L
Send to Stage	Ctrl + Alt + Q
Send to Exception	Ctrl + Shift + X
Rescanning	Ctrl + Alt + P
Recognize	Ctrl + R

3. Logging in to the Multi-Tenant System

To log in to the system as a user of a particular tenant, you must click the hyperlink "Log in to the Tenant" on the Login page.

Log In	
Password:	
L	OG IN
Registration	Log in to Tenant

On the next "Log in to Tenant" page, you must enter the name of the tenant in the corresponding field. Then system will redirect you to the tenant login page, where you must specify your user name and password.

4. Report Templates on the Administration and Monitoring Console

Now for each report type the user can create their own set of templates with different report settings. The Administrator can create report templates with desired settings. For example, two separate templates can be created based on the General Operators Report: one with statistics on the verification operators and one with statistics on the scanning operators. The Administrator can use these templates for generating reports every day to evaluate the performance of each verification or scanning operator. Report templates are saved for each user individually.

5. Rescanning

The ability to allow or prohibit editing the registration parameters and batch type when rescanning is now determined by a setting in the Batch Type properties. The respective option, **Prohibit changing batch type and registration parameters when rescanning**, has been added to the **General** tab of the **Batch Type Properties** dialog box of the Scanning Station.

6. Localization

French and Spanish UI languages are now available in the system.

The following components are now available in French and Spanish:

- Standalone:
 - o Administrator and Operator Stations' UI
- Distributed:
 - o Desktop Stations' UI (Project Setup Station, Verification Stations, Data Verification Stations, Scanning Stations)
 - Web Stations' UI
 - o Servers' UI (Administration & Monitoring Console, Processing Server Monitor, License Manager)

The full list of supported languages: English, German, Russian, Japanese, French, Spanish.

Issue description

If only processing station was installed (without any other stations), some files were missing.

After creating a new document on FlexiCapture Setup or Verification stations using drag-n-drop in thumbnails view, the focus went to the end of the list of documents.

When exporting image blocks to separate image files the name of a file with an image always had suffix "_1"

An error occurred when clicking on the document in Thumbnails view, if Batch ID was equal to Batch type ID and only all Document Definitions were disabled.

There was no possibility to scroll through the list of Document Definitions on Web Verification station.

Incorrect redirection URL to Login page after session timeout.

Filtration did not work for Event log in tenant.

An error occurred during report generation in cloud database.

Confirmation message that the document still contains errors is now more detailed and contains a list of types of errors.

Double check-rules occurred during task completing.

IPE occurred during project opening/loading from the server if test copy of the project had been deleted from the projects list on the Monitoring station.

General operators report. The data for pages column at the scanning stage was not correct.

General operators report was too long on large databases.

When station was closed without closing task, the changes were not saved.

The results of verification were lost, if a task was closed without Apply changes.

IMAP, Exchange 2013, 2016: import did not work due to an error in MS Exchange. IMAP server error: [COPYUID ...]

Export of the drawing to txt produced IPE: Src\TableCellsStructure.cpp, 872.

6 digits are now converted into date in fields with data format DDMMYY.

Read-only field may now display a list of allowed values the same way it worked in FlexiCapture 11.

An error occurred on Remote Verification Station in case page was marked for changing section's Document Definition and task was closed.

Known issue

Upgrade of x64 servers of the FlexiCapture 12 Release 1 Service Pack 1 starts without asking users' confirmation.
