Introduction

About This Document

This document describes changes made for ABBYY FlexiCapture 12 Release 1 Patch 2.

About the Product

ABBYY FlexiCapture 12 is a new version of the FlexiCapture product whose main goal is to provide a stable and scalable Data Capture platform, which can serve as a basis for creating regional and vertical solutions.

About the Patch

The patch is released to update Web Verification Station and fix the issues described below. It can be installed as a separate distributive or together with FlexiCapture 12 Release 1 Patch 1.

Technical Information

Release	Part #	Build #	OCRT build #	Release date
Release 1 Patch 2	1299/14	12.0.1.282	15.0.1.225	2017.07.19
Release 1 Patch 1	1299/13	12.0.1.267	15.0.1.224	2017.05.23
Release 1	1299/12	12.0.1.263	15.0.1.223	2017.05.19

New functionality

1. Custom Data Form on the Web Verification Station

Custom data form is available on the Web Verification station and includes all settings defined in the Document Definition. The following form elements and its parameters can be modified in the Document Definition editor and will be displayed correspondingly on the Web Verification data form:

- position and size of fields
- font size of fields and labels
- static text
- table and its settings
- possibility to hide/unhide empty columns in the table
- possibility to add instance of a repeating group/field in a random place
- custom tab order
- custom buttons.

Bug fix

Issue description
Verification
After verification of all document fields, verification of the next document did not start automatically.
Characters highlighted on the form, were not highlighted on the image.
Confirm All command did not work on group verification.
Data Set's title was not correctly displayed.

Issue description
Internal program error occurred during verification on specific scenario. IPE: d:\FC12.0.0Beta3\0\FineObjects\Inc\Errors.h, 140
Workflow
The option Wait for all documents of the batch was ignored if there were two scripting stages in the batch type and number of documents in the task was limited on the first scripting stage only.
The documents went to the next stage instead of the stage marked for documents if the checkbox Create task was disabled.
The last batch type was removed from the list of batch types when the project was exported from the server to the local copy.
Export
Export to SharePoint 365 was not working with the error "Cannot connect to SharePoint server: STS authentication error: 'Authentication Failure'" if the authorization via the local Active Directory was used.
Exported XML file did not correspond to XSD scheme.
Project Setup Station
The error "The RPC server is unavailable" occurred when the Project Setup Station was closed via a certain scenario.
Setting validation of field with a type Number the allowed values displayed with excess amount of digits after comma/dot.
Invoice LinelItems
The LinelItems from the Generic was matched instead of LinelItems from the FlexiLayout.
Web Verification Station
Station did not offer to save changes in previous document after switching to the next one.
The <i>Unauthorized</i> error occurred after selecting the project and trying to go to the queue view in the Web Verification within a tenant.
Web Verification station did not open within a tenant.
Web Verification station was not accessible via direct link or from personal page when using /winauth.
"Something bad happened" shortly displayed after opening the station.
Web Verification station was not accessible via direct link.
Next Error button did not open the next document with error, it was just highlighted.

Issue description
Task did not open via URL if specified taskId did not belong to the specified project (CurrentProjectId).
FlaxiLayout Studio
Incorrect focus in the image window in case block or element was highlighted.
It was not possible not exclude previous item of Relatable Group form the search area of the current one.
FormDesigner
Checkmark labels were not correctly displayed on forms converted form the previous version of FormDesigner.
