Introduction

About this document

This document describes the changes made in ABBYY FlexiCapture 12 Release 3 Update 2 Patch 5.

About the product

ABBYY FlexiCapture 12 is a new version of the FlexiCapture product, whose main goal is to provide a stable and scalable Data Capture platform that can serve as a basis for creating regional and vertical solutions.

About the patch

The patch includes fixes a critical bugs. It can be installed on its own, on top of ABBYY FlexiCapture 12 Release 1, 2, and 3 (with any updates installed). Release scope is incremental for FlexiCapture 12 Release 3 Update 2 Patch 4 and will include all features and fixes from that release.

Technical Information

Release	Part #	Build #	Installer build #	OCRT build #	Release date
Release 3 Update 2 Patch 5	1299/45	12.0.3.4058	210376	16.1.1014.16	2020.10.09
Release 3 Update 2 Patch 4	1299/44	12.0.3.4053	201379	16.1.1014.16	2020.09.25
Release 3 Update 2 Patch 1	1299/43	12.0.3.4040	176094	16.1.1014.15	2020.08.06
Release 3 Update 2	1299/42	12.0.3.4038	171689	16.1.1014.14	2020.07.23
Release 3	1299/35	12.0.3.2525	70734	16.1.681.26	2019.10.04

Bug Fixes

Issue description
After a certain period of time it would become impossible to move or resize a field region on the Web Verification station.
The Apply Changes procedure would become unresponsive if an error occurred during subtask processing.
An "ASP.NET session has expired or could not be found" error would occur when building reports in Cloud.

Known issues

1. From FlexiCapture 12 Release 3 Update 2 (12.0.3.4038) onwards, the behavior when assigning an empty string to `IPage.ResultClassName` has changed.

Previously, the application allowed this operation. However, doing this now will lead to an exception with the following message: System.Runtime.InteropServices.COMException (0x80004005): The result class name does not match any class in the classifier.

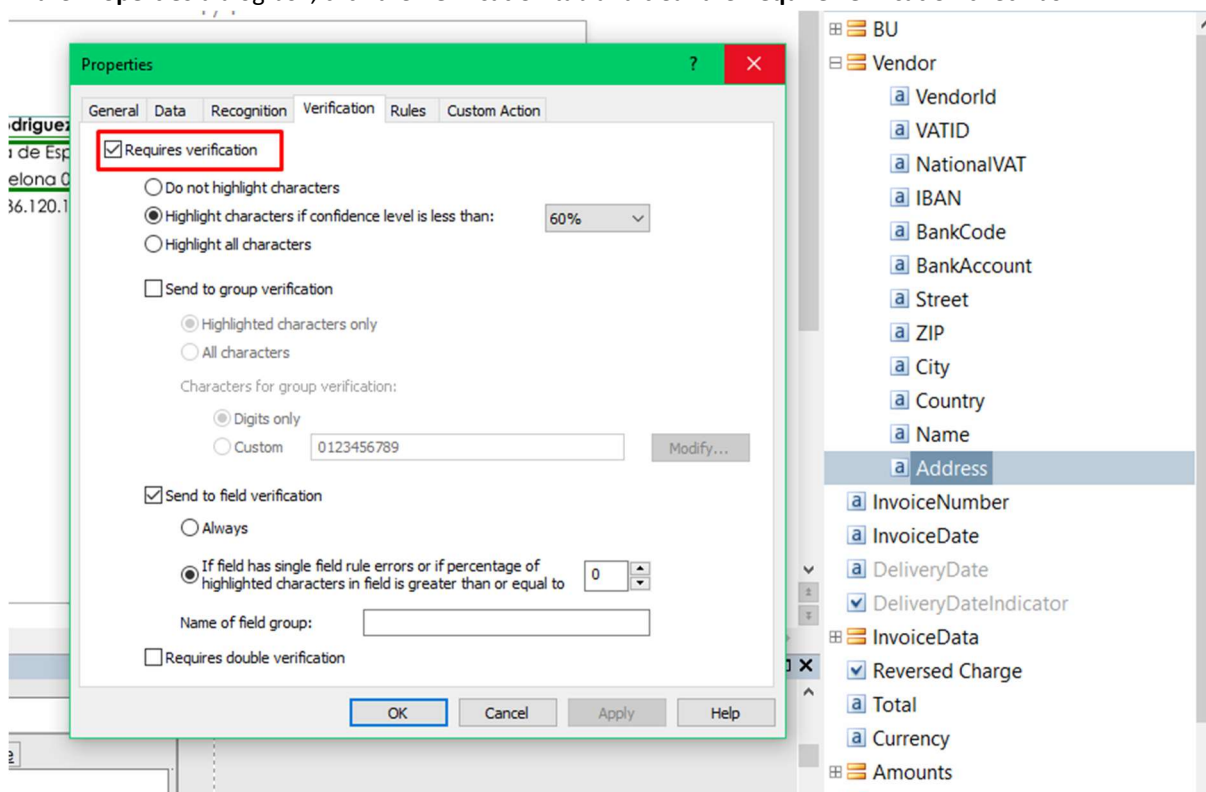

To avoid this error, should check that the following assigned string is not empty:

```
Code sample C#  
if( result.ClassName != "" ){  
    Page.ResultClassName = result.ClassName;  
}
```

2. From ABBYY FlexiCapture 12 Release 3 Update 2 (12.0.3.4038) onwards, a new field named **Address** is available in the **Vendor** and **BU** field groups in the invoice project. By default, this field is submitted for verification and export, which may cause troubles in processing.

To disable verification and export for the **Address** field in the **Vendor** or **BU** group:

1. Open the Document Definition Editor.
2. In the **Vendor** (or **BU**) group, right-click the **Address** field and then click **Properties...** on the shortcut menu.
3. In the **Properties** dialog box, click the **Verification** tab and clear the **Require verification** check box.

4. In the same dialog box, click the **General** and clear the **Export field value** check box.

Caption:

<input checked="" type="checkbox"/> Export field value 	<input type="checkbox"/> Show field in preview pane
<input type="checkbox"/> Read-only	<input type="checkbox"/> Should be matched
<input checked="" type="checkbox"/> Show on verification	<input type="checkbox"/> Has table layout
<input type="checkbox"/> Can be repeated	<input type="checkbox"/> Text segment
<input checked="" type="checkbox"/> Index field	<input checked="" type="checkbox"/> Can have region
<input type="checkbox"/> Index field region	<input type="checkbox"/> Allow multiple regions
<input checked="" type="checkbox"/> Use full-text recognition for quick fill-out	

Comment:

5. Click **OK**.

3. The **Apply Changes** command does not appear when going from a document that has been modified to another document by clicking on a page in that other document. The changes will be lost as a result. As a workaround, click on the document rather than on one of its pages.
4. In some cases spaces are removed in “amount of money” fields even if they are used as decimal separators.
